8.1 Due to the dimensions of the campsite, camping equipment longer than 6 meters (including the hitch) is not permitted on basic campsites.

8.2 Each campsite at Recreatiepark TerSpegelt is marked by numbered posts. These posts display your site number along with an arrow indicating your designated spot. If unclear, please contact Reception.

8.3 Position your camping equipment with the back against the vegetation or as otherwise indicated. Place it as centrally and as far back on the pitch as possible. Be mindful of the size of your pitch when setting up—avoid letting any part of your equipment, guy lines, windbreaks, or additional tents extend onto neighboring pitches.

8.4 To prevent damage to underground cables and pipes, digging trenches or holes on your campsite is not allowed. Do not use trees or bushes to support clotheslines or antennas. Do not drain wastewater directly onto the ground or plants; use a container for this purpose.

8.5 Setting up party tents is generally not allowed, except in specific cases. Using such a structure as a replacement for an awning or front tent is permitted as long as it does not cause any inconvenience (e.g., obstructing the view). The maximum size for a party tent is 3x3 meters, and it must not be taller than the camping equipment.

8.6 Small additional tents must be dome- or A-frame style and cannot exceed a ground area of 4 square meters. One additional small tent on your campsite is free of charge. A second small tent incurs an extra fee.

11. Access Control and Facial Recognition

11.1 During their stay at TerSpegelt, guests have access to the facilities.

11.2 Recreatiepark TerSpegelt offers facial recognition as an access control method for guests and season pass holders, and for attendance registration at SterrenStrand and the swimming pool. This system provides guests with a quick and easy way to access SterrenStrand and the swimming pool, eliminating the need to use or keep physical passes, wristbands, or other physical access methods. The software scans facial recognition points, which are then transformed by the scanner into a template. This template is the result of an algorithm and consists of multiple positions. In addition to being patented, the algorithm is secured with AES256 encryption. Templates cannot be traced back to a face.

Recreatiepark TerSpegelt collaborates with EasySecure for this system. EasySecure places a high priority on security and privacy, using software with the best security and highest privacy settings. The EasySecure Software is hosted in Cyso's data centers, which are ISO 20000, ISO 27001, and NEN 7510 certified. The EasySecure Software servers are distributed across three geographically separated Tier-4 data centers in the Netherlands. Tier-4 is the highest classification level for data centers. All data is automatically deleted one day after the reservation. Data is not used for purposes other than those described above.

The use of facial recognition is voluntary. If you do not wish to use facial recognition, please inform the reception. You may also withdraw your consent at any time.

If you do not wish to be recorded, please avoid the photographer and/or videographer.
